TO USERS

MINEFI is a hybrid mining-and-DeFi project. Its Telegram Mini App is LIVE at app.minefi.app (6 languages): users tap to mine free vMNFI from a fixed daily pool (shared among active miners, banked daily), boost with tiers & referrals, and claim real \$MNFI after TGE (25% + 75% vesting). Capital raised funds a real fleet of 1,000 Antminer L9 miners in Abu Dhabi — giving the token a tangible, revenue-backed foundation.

Why MINEFI is different

- ▶ Real assets: revenue from physical miners, not just emissions
- ▶ Verifiable: 13 contracts published on BscScan
- ▶ Realistic: conservative projections, no "guaranteed returns"
- ▶ Live now: Telegram Mini App (6 languages) — tap-to-earn vMNFI, Diamond Hands (top holders, active 14+ days)
- ▶ Audit planned with Hashlock before mainnet

Real Mining — Antminer L9

Specification	Value
Algorithm	Script (LTC/DOGE)
Fleet (Year 1)	1,000 units · ~16 TH/s
Cost / unit	\$3,360 + \$1,200 immersion
Total CapEx	\$4,560,000
Location	Abu Dhabi, UAE

Roadmap

P1	P2 Audit/	P3 Sales	P4 Launch	P5 Growth
Contracts	Legal	Jul-Aug	Sep'26	2027+
May'26	Jun-Jul			

Tokenomics — 1,000,000,000 \$MNFI

Sale Rounds

Round	Price	Tokens	Raise
Seed	\$0.025	60M	\$1.5M
Private R1	\$0.035	50M	\$1.75M
Private R2	\$0.040	100M	\$4.0M
Public	\$0.060	150M	\$9.0M
Total	—	360M	\$16.25M

Security & Audit

Solidity 0.8.27 + OpenZeppelin v5. Role-based access, ReentrancyGuard, anti-bot/anti-whale, multi-sig treasury & EmergencyPause. Independent audit by Hashlock planned before any mainnet deployment.

For information only. Not financial advice or an offer of securities. All figures are targets, not guarantees. Crypto involves risk of total loss. Testnet addresses change on mainnet.
